

### Script to get input for gnuplot file

<<DESCRIPTION

-First, I generated the IP addresses from given input file using regex expression.

-Second, I used the obtained IP addresses and generate the Longitude, Latitude, city and country name using curl function calling geoiplookup site.

-Third, I redirected and appended the obtained output to file called world.cor and to color the IP marker I sorted out the added files in world.cor folder

-Fourth, I created the gnuplot script in the project directory and added values to plot world map and obtained IP addresses to produce a png file.

-Fifth, I changed the pointer style, added label and key to distinguish datas in the obtained png file from gnuplot script.

DESCRIPTION

#Read the input IP file

Inputfile=\$(Exam2-IP\_Output.txt )

#Creates two different text files, one with standard output(world.cor) and other with colored output(customer.cor)

touch world.cor

touch customer.cor

#Creating loop to read through each line and get required customer information using IP addresses and storing desired output

while read line;

do

curl -s https://json.geoiplookup.io/\$line | \  
jq -r '.longitude, .latitude, .city, .country\_name' | \  
while read -r LONGITUDE; do

read -r LATITUDE

read -r CITY

read -r COUNTRY

echo -e "\${LONGITUDE} \${LATITUDE} #\${CITY},

\${COUNTRY}">>world.cor

echo -e "\e[31m\${LATITUDE}, \e[95m\${LONGITUDE}, \  
\e[33m\${CITY}, \e[34m\${COUNTRY}">>customer.cor

#Adding a two second gap between consecutive calls

sleep 2s

done

#Setting the upper boundary of loop

done < Exam2-IP\_Output.txt

#Calling the gnuplot that uses the data from world.cor and plots the required map

gnuplot GnuPlot.gnuplot

### Script to create gnuplot

```

set terminal pngcairo transparent enhanced background rgb 'white' font
"arial,10" fontsize 1.0 size 1200, 800
set output 'output.png'
set format x "%D %E" geographic
set format y "%D %N" geographic
set style data lines
set yzeroaxis
set title "Gnuplot Correspondences\ngeographic coordinate system"
set xrange [ -180.000 : 180.000 ] noreverse nowriteback
set x2range [ * : * ] noreverse writeback
set yrange [ -90.0000 : 90.0000 ] noreverse nowriteback
set y2range [ * : * ] noreverse writeback
set zrange [ * : * ] noreverse writeback
set cbrange [ * : * ] noreverse writeback
set rrange [ * : * ] noreverse writeback
NO_ANIMATION = 1
set label 1 "Fig: Displays the customer's location" at -175.0,-60.0 font
"arial,15" textcolor rgb 'black' noint
set key at -100.0,-40.0 font "arial,15"
plot 'world_10m.txt' with lines lc rgb "blue", 'world.cor' with points pt 5
lc "red"

```
